

### 3rd GRADE MINIMUM CONTENTS

#### UDI 1: OUR BODY – THE SKELETON (1)

##### ► THE SKELETON

The skeleton is made up of **bones**. Bones are hard, strong and rigid. An adult skeleton is made up of 206 bones. Bones are living things. While you are growing, they are growing too. The skeleton has two important functions. It supports our body and it protects the delicate, soft organs inside. The ribs protect our heart and lungs. The skull protects our brain.

## UDI 1: OUR BODY – THE SKELETON (1)
